Product Description

Stainless Steel Perforated Plates 304 CAD Drawing Customization 0.6mm Thickness 1219*2438 Mm Size ASTM Standard

The most common applications of stainless steel sheet include household items and fixtures. In particular, its high corrosion resistance makes it a leading choice for industries such as food, textiles, chemical, transportation, and aerospace.

This alloy find its usage in sinks, the common coils in vaporizers, machinery parts, screws, automobiles, water filtration devices, food processing equipment, airplanes, rockets, construction, dyeing equipment, chemical containers, and heat exchangers.

The 304 stainless steel are also used for screws, nuts, bolts, and other types of fasteners in marine applications.

Product category
