Product Description

Colored Stainless Steel Sheets 304 Golden Surface 0.2mm Thickness Customized Size Cold- Rolled

Food is a common source of corrosion because of the high acid content in items such as fruit and meat. Thus, stainless steel is a first choice for items including tabletops, sinks, refrigerators, coffee pots, stoves, and liquid dispensers.

One of the most common uses of 304 stainless steel has always been for kitchen utensils, including pots, pans, and flatware.

This allows 304 steel to be stamped and deep drawn for a variety of applications, including sinks, saucepans, and other hollow ware.

This was all about 304 Stainless Steel sheets that you need to know before making a purchase decision. Because of its advantages and features, these sheets are extremely useful.
