- Grade: SGCC
- Highlight: **Cold Rolled 316 Steel Pipe,
TUV Standard 316 Stainless Steel Pipe**

Product Description

TUV Standard 316I Stainless Steel Sheet Metal No.1 Surface Finish

What is 316 Stainless Steel?

Grade 316 Stainless Steel is the second most commonly used stainless steel, behind 304 stainless steel. It is an austenitic, corrosion-resistant steel with excellent strength, toughness, fabrication characteristics and weldability. The low carbon version, 316L, may be required for full corrosion resistance when thicker sections are welded. The 316H version has a guaranteed minimum carbon content, which ensures good strength at high temperatures.
